

LEARNING EXPEDITION · LYON · THURSDAY 25 JUNE 2026

Innovation Lab

Field Notes

A working notebook for your two visits — capture what you see, score each space, and reuse it for your final graded canvas. Methods, best practices and space-organisation cues are on the next pages; the blank canvases follow.

MORNING · 10:30–12:30	Orange — HQ, Lyon 7	Host: Julien Manivong, Solutions Engineer
AFTERNOON · 14:00–16:00	Sanofi — 14 Bis Innovation Lab	Host: Sylvain Grivel, Head of 14 Bis · arrive 13:45

The 5 analysis lenses (use these on every space): aesthetic choices · functional choices · creation strategy · operating model · opportunities & threats.

Reminder before access: bring valid photo ID and complete the Sanofi SAFE safety training before Monday 23 June.

Methods cheat-sheet

The tools a healthy lab uses — grouped by what they are for. Tick the ones you spot on site.

DISCOVER	■ Design Thinking — Em pathise·Define·Ideate·Prot otype·Test	■ Customer Journey Map	■ Jobs-to-be-Done interviews	■ Personas & empathy maps
IDEATE	■ Crazy 8s / brainwriting	■ Business Model Canvas (9 blocks)	■ Value Proposition Canvas	■ Three Horizons (H1/H2/H3)
BUILD & TEST	■ Design Sprint (5 days)	■ Lean Startup — Build·Measure·Learn	■ Assumption / riskiest-first mapping	■ Pirate metrics (AARRR)
SCALE & GOVERN	■ Stage-Gate funding	■ OKRs	■ Innovation Ambition Matrix (70-20-10)	■ Generative AI co-pilot

Best practices — the 5 conditions for lab survival

Audit questions to ask each host — note the answer next to each.

Mandate	Is there a clear strategic mandate & an executive sponsor?	
Metrics	Is success measured beyond "ideas generated"?	
Scale path	Is there a defined route from lab to the core business?	
Right to fail	Can a project be killed without career damage?	
Funding	Is funding multi-year, or hostage to the annual budget?	

Space organisation — what to look for

Space is behavioural infrastructure. Note how each lab uses these levers.

Proximity	Are mixed teams clustered to force "collisions"? (comms drop sharply beyond ~50 m)	■ seen
Visibility	Is work on the walls — writable surfaces, pin-up zones, prototype shelves?	■ seen
Modularity	Does furniture move — casters, foldable walls, reconfigurable rooms?	■ seen
Zoning	Are loud/divergent zones separated from quiet/focus zones? Acoustics?	■ seen
Threshold	Does entering the lab feel different from the corridor? Identity & ritual?	■ seen
Making	Is there a maker corner (3D print, cardboard, electronics) to lower the cost of trying?	■ seen

Zoning sketch — draw the floor plate you see

Rough the layout: entrance, collaboration, focus, meeting, maker, demo, lounge.

SKETCH / PLAN

Analysis canvas — Orange (Lyon 7)

Host: Julien Manivong, Solutions Engineer · Date: 25 June 2026 · Time: _____

AESTHETIC CHOICES <i>look & feel, materials, light, brand</i>	FUNCTIONAL CHOICES <i>zones, flow, furniture, tech</i>
CREATION STRATEGY <i>why built, sponsor, ambition, horizons</i>	OPERATING MODEL <i>team, programs, funding, metrics</i>
OPPORTUNITIES & THREATS <i>what works, what is at risk</i>	OVERALL SCORE __ / 5 <i>one big takeaway from this space</i>

Analysis canvas — Sanofi — 14 Bis Innovation Lab

Host: Sylvain Grivel, Head of 14 Bis · Date: 25 June 2026 · Time: _____

AESTHETIC CHOICES <i>look & feel, materials, light, brand</i>	FUNCTIONAL CHOICES <i>zones, flow, furniture, tech</i>
CREATION STRATEGY <i>why built, sponsor, ambition, horizons</i>	OPERATING MODEL <i>team, programs, funding, metrics</i>
OPPORTUNITIES & THREATS <i>what works, what is at risk</i>	OVERALL SCORE __ / 5 <i>one big takeaway from this space</i>

Question bank & free notes

- What is your mandate — and who is the executive sponsor?
- How do you measure success beyond "ideas generated"?
- What happens to a validated concept — who scales it?
- Can a project be killed without hurting a career?
- How does this lab coexist with R&D / corporate VC / M&A?
- Which space decisions changed how people behave?
- How do bottom-up ideas reach you from the rest of the org?
